High Powered Diode Laser System for Hair Removal

Emvera Diolux is a high powered 810nm diode laser for permanent hair removal. Enhanced power provides less pain and effective results. Emvera Diolux also treats all skin types, because of the various pulse mode.

Shortened Operating Time

Emvera Diolux has the ability to operate at up to 10Hz, meaning a full back can be treated in as little as seven minutes.

Increased Safety and Lower Costs

Emvera Diolux utilizes a diode laser which is far more stable and uniform than other laser wavelengths used for hair removal (i.e. Alexandrite 755nm). This results in a system that costs much less to maintain and has safer and more effective results.

Less Pain

Emvera Diolux has a powerful chilled tip cooling system to minimize pain and reduce the risk of burning.

Various Applications

Emvera Diolux allows the operator to change their pulse mode from CW to short, long or combined pulses or even a MultiPulse mode which can protect darker skins. Coming soon will be a smaller spot sized handpiece for effective vascular and pigmentation treatments.

Accuracy

Emvera Diolux's Specified Optical Device (SOD) uniformly radiates laser wavelengths so treatments are more effective. The SOD makes it possible to deliver concentrated high efficiency energy at the follicle, which decreases the loss and scattering of laser light.

Emvera Diolux Laser

For more information visit www

SPECIFICATIONS

Laser Diode Type High power CW laser diode
Laser Diode Power 810nm Max 600w
Energy Output Up to 120J/cm2
Spectrum 810nm
Spot Size 12 x 11 mm
Pulse Duration Up to 625ms
Pulse Repetition Rate 1~10Hz/ 1Hz Step
Cooling Water Cooling (-5°C~5°C)
Optical Guide Sapphire Crystal

The Best Price, the Best Terms

Our lasers are affordably priced, with financing plans tailored to your needs. Use our devices in your practice now, with manageable monthly payments. Along with our excellent pricing and financing options, we include generous trade-in and trade up opportunities.

Order Your Laser Today and Schedule Your Training Date

Our experienced trainers are available to arrange a hands-on training session for you and your technician. Please contact us to begin your Emvera experience.
